Hassan Mohiuddin

Full Stack Software Engineer

hassanmohiuddin73@gmail.com +92-335-5440890 Islamabad Github Linkedin

Profile

Full Stack Software Engineer with 4+ years of experience building scalable web and AI-powered applications using React, Next.js, Node.js, FastAPI, and Azure. Experienced in developing cloud-native solutions, integrating Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), REST APIs, and modern DevOps workflows using Docker and CI/CD. Passionate about building performant, production-ready software that delivers measurable business value.

Experience

Software Developer, *Resilient Technologies Ltd* 06/2025 – Present
Remote

- Developed scalable backend services and APIs using Python, FastAPI, Node.js, MySQL, and MongoDB, with asynchronous processing and cloud-based architectures.
- Contributed to a Blockchain/Web3 project, working with blockchain integrations and technologies including Solidity, Polygon, ethers.js, and Web3 tooling.
- Developed document-processing solutions using OCR and Mistral-based LLM workflows for information extraction and intelligent document analysis.
- Build and integrate AI capabilities using LLMs, RAG, LangChain, vector search, and automated data-processing pipelines.
- Collaborate with Resilient Technologies' engineering team on architecture, feature development, production debugging, and delivery of client projects.

Full Stack Developer, *Mobipixels* 06/2025 – 06/2026
Islamabad

- Architected backend services into a scalable, containerized Azure infrastructure, redesigning the data layer into an asynchronous, high-throughput architecture that improved system scalability and reliability.
- Built GenAI-powered analytics pipelines using Large Language Models (LLMs), LangChain, and Retrieval-Augmented Generation (RAG) with vector search to transform unstructured customer feedback into actionable business insights.
- Developed responsive React frontends, optimized MySQL database queries, and integrated Stripe subscription billing to deliver seamless end-to-end user experiences.
- Delivered production-ready features from design to deployment while improving application reliability through monitoring, logging, debugging, and rapid production issue resolution.
- Implemented cloud-native DevOps practices by deploying containerized services on Microsoft Azure and enhancing CI/CD pipelines with automated linting, type checking, unit, integration, and end-to-end testing.
- Designed and integrated secure REST APIs, collaborating with frontend and backend teams to deliver scalable, maintainable features.

React-Native Developer, *Mapsimum (Part-time contract)* 09/2024 – 03/2025
Remote

- Designed and implemented Mobile application for a Driver App
- Collaborated with product and engineering teams to define and deliver new features

Software Engineer, *DevHawks* 08/2022 – 01/2025
Islamabad

- Developed full-stack features for a healthcare platform using React, Node.js, Express, and MongoDB, delivering scalable solutions for patient management and medical workflows.
- Collaborated closely with product managers, designers, and developers to design, implement, and deploy new features in an Agile development environment.
- Improved application reliability by writing unit tests, performing code reviews, debugging production issues, and following clean code best practices.

Education

Bachelor of Science in Software Engineering, *COMSATS University, Islamabad*

Skills

Languages
JavaScript, TypeScript, Python

Databases
MySQL, MongoDB, PostgreSQL, Chroma

APIs & Integrations
Google Business Profile, Google Tag Manager, Google Analytics, Google OAuth 2.0, Google Pub/Sub, Stripe, Kafka. DataForSeo, SendGrid / AWS SES, Google Cloud TTS, Google Cloud Translation

Blockchain & Web3
Solidity, Polygon, ERC-721/ERC-1155, Hardhat, OpenZeppelin, ethers.js, ,web3.py IPFS/Pinata, Alchemy, Privy (MPC wallets)

others
n8n, Claude Cowork,Sentry

Frameworks
React, NEXT, Node , FastApi , LangChain, Scikit-Learn

Cloud
AWS, Azure, CI/CD, Linux, Docker, Kubernetes

AI & Machine Learning.
Neural Networks, RAG (Retrieval-Augmented Generation), LLMs, Chatbot Development, DINOv2

Version Control & Collaboration
Git, GitHub, BitBucket , Jira, Trello, Scrum

Testing
Jest, Cypress, Playwright

Projects

Perception and Insights Explorer ,
2025 – Present
React, Node, Express, MongoDB, My SQL, FastApi

- Developed an AI-powered analytics platform enabling businesses to aggregate, analyze, and query data from multiple sources including Google Business Profile and Stripe APIs.
- Designed scalable backend services using Node.js, Express, and MongoDB to process and manage business intelligence data.
- Implemented Retrieval-Augmented Generation (RAG) pipelines using LangChain, vector databases, and LLM APIs to provide contextual AI-powered search and insights.
- Integrated OAuth2 authentication, Google APIs, payment workflows, and asynchronous processing using cloud messaging services.
- Deployed and maintained production infrastructure using Docker, Azure/AWS services, and Linux-based environments.

Resilient Technologies Website (resilienttech.co.uk), 2025 – Present
WordPress, Divi, PHP, JavaScript, HTML/CSS

- Designed and built the full marketing website for Resilient Technologies Ltd, a UK-based AI consultancy and Microsoft for Startups / NVIDIA Inception member, covering home, about, blog, and legal/policy pages
- Developed custom, self-contained UI components (branded partner cards, hero sections, responsive 3-column feature layouts) with hand-written HTML/CSS beyond the page builder's native capabilities
- Implemented a category-filtered blog platform with a custom JavaScript dropdown filter and page-scoped PHP hooks, cleanly separating general content from product (PAIEX) publications
- Delivered a fully responsive design across desktop, tablet, and mobile with server-side caching for fast page loads

SkillSync Pro, *React, Node, Express, MongoDB, FastApi* 2024 – 2025

- Developed a web application to streamline the recruitment process through Skill assessment and Automated Interviews.
- Build a RAG chatbot for User Queries related to Job Postings

Mapsimum Mobile, *React-native, Node, Express, MongoDB* 2024 – 2025

- Developed a mobile application that allows users to conveniently book rides for their day-to-day travel needs. It provides an easy-to-use interface for booking transportation services, offering a variety of options such as cars, bikes, and shared rides.

Nawalah, *React, Node, Express, Firebase* 2024

- Developed a web application aimed at reducing food waste by connecting businesses, such as restaurants and grocery stores, with NGOs that can redistribute excess food

MadTalk, *React, Node, Express, MongoDB, Python* 2022 – 2024

- Developed an application like ChatGPT but specifically for the medical field, which helps users by answering queries related to medical diseases and providing information. Additionally, users can upload images to receive results related to lung, kidney, and heart diseases
